EVOLUCIÓN

Con una experiencia de más de 20 años diseñando, desarrollando y fabricando artículos de iluminación técnica y decorativa para algunas de las marcas más prestigiosas en todo el mundo, en 2015 se inicia el proyecto de implantación de nuestra propia marca, YLD.

En 2016 inicia su actividad YLD España, sede central para Europa del proyecto de internacionalización de la marca, teniendo como primer objetivo la implantación en el mercado español y la selección de los productos más adecuados al gusto y necesidades del cliente europeo, dándose su presentación oficial en octubre de ese mismo año en la feria Matelec de Madrid.

Durante 2017 continúa el proceso de implantación y presentación de la marca, con participación en las ferias Construmat, en Barcelona, y Hábitat, en Valencia, y con el cierre de acuerdos de distribución y fabricación en España e Italia.

El año 2018 supone un avance muy importante en el proceso de internacionalización y en la progresión de la marca a nivel europeo con la puesta en marcha de delegaciones YLD en Portugal con Lampicris Iluminação, en Lituania, Letonia y Estonia con UAB Ekoliumenas y finalmente en Bulgaria con Prisma Lighting.

Igualmente, en la feria Matelec de Madrid 2018 se presenta la nueva imagen de marca y la nueva gama de iluminación técnica y decorativa.

En 2019 se inicia con la presencia y presentación

de YLD en la feria Lighting Days de Lyon (Francia) y con el acuerdo para la implantación de YLD en Francia junto a la empresa MW Marvalway.

Nuestro objetivo de implantación a nivel europeo sigue su curso y confiamos en seguir con la apertura de delegaciones YLD en todos los países de la UE en los próximos años.

Con el lanzamiento del catálogo YLD 2020/22 seguimos evolucionando nuestra gama de productos enfocados principalmente a la iluminación decorativa y técnica, manteniendo y mejorando día a día los procesos de I+D, producción y distribución.

Del mismo modo, mantenemos nuestro ideal y nuestro objetivo de fabricar productos de alta calidad, innovadores y que ofrezcan soluciones al mercado de la iluminación.

EVOLUTION

With more than 20 years of experience in design, development and production of technical and decorative lighting products for some of the most prestigious brands all over the world, the implementation project of our own brand YLD started in 2015.

As head office in Europe, YLD Spain undertook its business in 2016, being its main purpose the deployment in the Spanish market and the selection of products in accordance with the preferences and needs of European customers, apart from designing an internationalization plan in order to introduce the brand in other countries. Its official launching event took place that year in Matelec trade fair (Madrid).

The brand implementation continued in 2017, through participation in trade fairs such as Construmat, in Barcelona, and Hábitat, in Valencia, and by entering into distribution and production agreements in Spain and Italy.

With the opening of new YLD branches in Portugal with the company Lampicris Iluminação, in Lithuania, Estonia and Latvia with UAB Ekoliumenas and finally with Prisma Lighting in Bulgaria, year 2018 represented a very important progress in the internationalization process and in the recognition of the brand at European level.

It was also in Matelec fair 2018 (Madrid) where YLD presented its new brand image and the new range of technical and decorative lighting products.

Year 2019 began with the attendance and the presentation of YLD in Lighting Days fair in Lyon (France), and the conclusion of a new agreement with the company MW Marvalway to set YLD France.

Our goal of implementing YLD brand at European level runs its course and we hope to keep opening new YLD branches in every country of the EU in the years to come.

With the release of the new catalogue 2020/22 we keep working on our range of products especially focused in decorative and technical lighting, improving day by day the production, distribution and I+D processes.

In the same way, we maintain our ideal and our purpose of manufacturing top quality and innovative products, able to offer solutions to the lighting market.

EVOLUTION

Avec plus de 20 ans d'expérience dans les domaines du design, du développement et de la fabrication de produits d'éclairage technique et décoratif pour quelques marques prestigieuses dans le monde, le projet d'implantation de notre propre marque YLD a démarré en 2015.

Siège central en Europe du projet d'internationalisation de la marque, YLD Espagne a commencé ses activités en 2016, en se fixant comme premier objectif son implantation dans le marché espagnol et la sélection des produits les plus adaptés aux goûts et besoins du client européen, en procédant à sa présentation officielle en octobre de la même année lors de la Foire Matelec de Madrid.

Le processus d'implantation et de présentation de la marque s'est poursuivi en 2017, avec la participation aux foires Construmat à Barcelone et Habitat à Valence, et avec la conclusion d'accords de distribution et de fabrication en Espagne et en Italie.

Avec l'ouverture de succursales YLD au Portugal avec Lampicris Iluminação, avec UAB Ekoliumenas en Lituanie, Letonie et Estonie et finalement Prisma Lighting en Bulgarie, l'année 2018 a représenté une avancée très importante dans le processus d'internationalisation et dans la progression de la marque au niveau européen.

C'est également à la foire Matelec de Madrid de 2018 où a eu lieu la présentation de la nouvelle image de la marque et la nouvelle gamme d'éclairage technique et décoratif.

Le début de l'année 2019 marque la présence et la présentation de YLD à la foire Lighting Days de Lyon (France) et un nouvel accord pour l'implantation de YLD en France aux côtés de l'entreprise MW Marvalway.

Notre objectif de nous implanter en Europe continue et nous espérons le poursuivre avec l'ouverture de succursales YLD dans tous les pays de l'UE dans les prochaines années.

Grâce au lancement du catalogue YLD 2020/22, nous poursuivons l'évolution de notre gamme de produits orientés principalement vers l'éclairage décoratif et technique. Nous continuons aussi de maintenir et d'améliorer au jour le jour les processus de I+D, aussi bien pour la production que la distribution.

De même, nous maintenons notre idéal et notre objectif de fabriquer des produits de haute qualité, innovants et offrant des solutions au marché de l'éclairage.
